About Brug Al Hajjaz

Brug Al Hajjaz is a professionally managed technical services and industrial support company based in Makkah, Kingdom of Saudi Arabia. The company provides a wide range of integrated services including technical contracting, manpower support, industrial supply, equipment rental, and facility operations & maintenance.

With a multidisciplinary team and strong operational capabilities, Brug Al Hajjaz supports construction, infrastructure, industrial, and oil & gas sectors by delivering reliable and efficient project solutions.

Our services are structured to ensure quality, safety, and compliance with industry standards while maintaining operational efficiency and cost effectiveness.

Vision

To become a trusted and leading service provider in technical services, industrial support, and trading across the Kingdom.

Mission

To deliver high-quality services through skilled manpower, advanced technical solutions, and strong commitment to safety, reliability, and client satisfaction.

TECHNICAL SERVICES

Brug Al Hajjaz provides specialized technical services that support industrial operations, construction projects, and oil & gas activities. Our team combines engineering expertise, skilled manpower, and modern equipment to execute projects safely and efficiently.

Our technical services division covers multiple disciplines including civil works, mechanical installations, electrical systems, testing and calibration, environmental services, and facility management.

Through structured planning and professional execution, we ensure all technical operations meet industry standards and client requirements.

CIVIL SERVICES

Our civil division provides reliable infrastructure and construction support services for industrial facilities, project sites, and oilfield operations.

Labor Camps Construction

We design and construct labor accommodation facilities including foundations, structural works, utility installations, kitchens, sanitation systems, and essential infrastructure required for workforce communities.

Security Fence Construction

We install secure perimeter fencing systems for industrial facilities, construction sites, and restricted operational zones including chain link fences, steel fencing, barbed wire systems, and access gates.

Civil Works & Rig Site Support

Our civil support services include site leveling, access road construction, drainage systems, concrete foundations, equipment bases, and infrastructure works required for oilfield rig sites.

MECHANICAL SERVICES

Brug Al Hajjaz provides specialized mechanical services supporting industrial plants, infrastructure facilities, and oilfield operations.

Firefighting Systems Services

Installation and maintenance of firefighting systems compliant with UL, FM, NFPA, SBC, and SASO standards, including hydrant systems, sprinkler systems, fire pumps, and fire alarm integration.

Piping, Welding & Fabrication

Professional piping installation, welding works, and structural fabrication services performed by certified technicians following approved welding procedures and industry standards.

Structural Works

Installation and erection of steel structures, equipment supports, platforms, and industrial frameworks.

HVAC

Installation and maintenance of HVAC systems including ventilation systems, air conditioning units, ducting systems, and industrial cooling solutions.

IT& AI SERVICES

Brug Al Hajjaz provides specialized technology services that support industrial operations, security systems, and infrastructure monitoring.

Instrumentation & IT Systems

Installation and support of instrumentation systems, monitoring devices, control systems, and industrial communication networks.

Communication networks

Security Systems (SAIS Compliance)
Implementation of security solutions aligned with Supreme Authority for Industrial Security (SAIS) requirements.

Security Command Centre (SCC)

Design and support for centralized monitoring systems including surveillance integration, control rooms, and operational security management platforms.

ELECTRICAL SERVICES

Our electrical division delivers comprehensive electrical construction, installation, and maintenance services for industrial facilities and infrastructure projects.

Services include electrical system installation, power distribution systems, panel installation, cable laying, lighting systems, and electrical maintenance.

We ensure all electrical works are performed in compliance with safety regulations and approved engineering standards.

TESTING & CALIBRATION

Brug Al Hajjaz provides reliable testing and calibration services to ensure equipment accuracy, safety, and operational reliability.

Our services include calibration of pressure gauges, temperature sensors, flow meters, transmitters, and industrial instrumentation equipment.

Through precise verification and certified calibration procedures, we help organizations maintain system performance, regulatory compliance, and operational efficiency.

HSE & SUSTAINABILITY

Brug Al Hajjaz is committed to promoting safe working environments and sustainable operational practices.

Energy & Sustainability Services

We support clients in improving energy efficiency, reducing environmental impact, and implementing sustainable operational strategies.

Environmental Services

Our environmental services include waste management planning, environmental monitoring support, pollution prevention measures, and regulatory compliance guidance.

HEALTH, SAFETY & ENVIRONMENT (HSE)

Labor Camp Food Management

Brug Al Hajjaz provides professional food establishment and catering management services for labor camps and workforce accommodations.

Our services include kitchen setup, meal preparation, food storage management, dining facility operations, and hygiene monitoring in accordance with food safety regulations.

We ensure workers receive nutritious meals prepared under strict hygiene standards to support health and productivity.

TRADING

Material Supply

Brug Al Hajjaz provides reliable trading services supplying equipment and industrial materials required for construction, oil & gas, and infrastructure projects.

Trading of Oil & Gas Equipment

Supply of valves, fittings, piping materials, safety equipment, and industrial components required for oilfield operations.

Industrial General Supply

Procurement and supply of electrical materials, mechanical components, tools, hardware, and maintenance consumables.

RENTAL SERVICES

We provide flexible equipment rental solutions to support industrial and oilfield operations.

Machineries, Equipment's, Vehicles & Trucks

Heavy equipment, construction machinery, transport vehicles, and operational equipment for project sites.

Tanks for Oilfield Water Logistics & Fuel

Supply of storage tanks and transport units used for water logistics and fuel management.

Specialized Water Tanker Fleet

Dedicated water tanker fleet for industrial operations, construction sites, and oilfield support.

OPERATION & MAINTENANCE SERVICES

Brug Al Hajjaz provides professional O&M services to ensure continuous and efficient operation of facilities and infrastructure

Labor Camps O&M

Complete management and maintenance of labor camp facilities including utilities, sanitation systems, and infrastructure maintenance.

Fire & Safety O&M

Inspection, testing, and maintenance of fire protection systems including fire pumps, hydrants, sprinklers, and alarm systems.
